

DETK | Dry Explosives Test

The SwabTek Dry Explosives Test Kit is a single-use spot-test designed for use in screening for EXPLOSIVES and EXPLOSIVES PRE-CURSORS in any dry sample, or on any surface. The test consists of three separate phases, with each screening for the presumed presence of a different class of explosives and constituents:

- Nitroaromatics
 - TNT
 - DNT
 - etc.
- Nitrogen Chemicals
 - Nitrates
 - Nitroamines
 - Nitroesters
- Oxidizers
 - Hydrogen Peroxide
 - Chlorate

SwabTek's unique form-factor helps to ensure proper sample collection and reduces the user's risk of exposure during testing.
