

NTK | Amphetamine Test Kit

The SwabTek Amphetamine Test Kit is a single-use spot-test designed for use in screening for AMPHEMATIME CLASS NARCOTICS in any sample, or on any surface. The test is capable of identifying the presumed presence of amphetamines in very small quantities, with a level of detection as little as 0.5 μg in mass. The test has been validated by a third-party lab, testing to the standards established by the National Institute of Justice, at a 0.0% false positive rate for the following:

- Amphetamines
 - Amphetamines
 - Methamphetamine
 - MDMA
- Cathinones and Synthetics
 - Khat Plant
 - Ethylone
 - Methylone

SwabTek's unique form-factor helps to ensure proper sample collection and reduces the user's risk of exposure during testing.
