

NTK | Heroin Test Kit

The SwabTek Heroin Test Kit is a single-use spot-test designed for use in screening for HEROIN and a number of MAJOR OPIATES in any sample, or on any surface. The test is capable of identifying the presumed presence of opiates in very small quantities, with a level of detection as little as 400 µg in mass. Based on third-party validation, the test is verified to test for the following:

- Heroin Varieties
 - Black Tar Heroin
 - Afghan Brown Heroin
 - China White
 - etc.
- Other Opioids
 - Synthetic Opioids
 - Morphine
 - Codeine
 - etc.

SwabTek's unique form-factor helps to ensure proper sample collection and reduces the user's risk of exposure during testing.
