APPLICATIONS

Camera: 32.5 MP High-Quality CMOS Sensor / RAW Imaging & Video Recording / RAW, JPEG & HEIF Imaging Capabilities / Continuous Autofocus.

Hardware: Contactless LAB Ultra is a professional system used to examine fingerprints on reflective and curved surfaces without any chemical or powder treatment. Export images to a TF card / 256 GB memory.

Evidence Quality: Prevents DNA contamination and safeguards against evidence destruction. Provides a secure work environment without the need for chemical treatments.
