# CONTACTLESS LITE

World's First 100% Contactless Latent Fingerprint  
Detection System on Reflective Surfaces!

SCAN THE CODE  
FOR THE PROMOTIONAL  
VIDEO

32.5MP High-Quality  
CMOS Sensor

RAW Imaging and  
Video Recording

RAW, JPEG & HEIF Imaging

Possibility of Imaging up to 5  
Meters

Continuous Autofocus

Imaging & Focus System

No Need to Calibrate

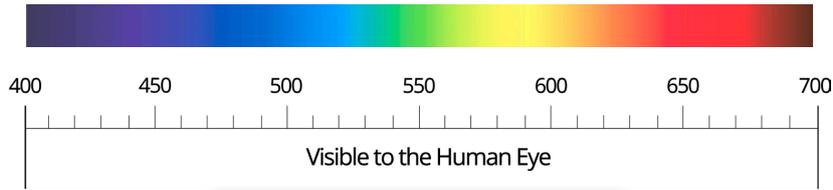

Gel Lifter Section

Crystal-Clear Imaging on  
Reflective Surfaces

Transcending Fingerprints to The Next Level

Contactless Lite Camera and Light Source Units  
Spectral Range

## APPLICATIONS

Latent Fingerprint  
on Light Switch

Latent Fingerprint on Glass Bottle  
(The Gellifter Section is Used)

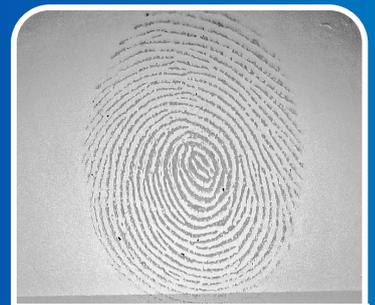

Latent Fingerprint on  
Toilet Flush

Latent Fingerprint on  
Security Alarm

Latent Fingerprint  
on Window

Latent Fingerprint on  
Phone Screen

**Camera:** 32.5 MP High-Quality CMOS Sensor / RAW Imaging & Video Recording / RAW, JPEG & HEIF Imaging Capabilities / Continuous Autofocus

**Hardware:** Contactless LITE is Used to Examine Fingerprints Neatly on Reflective Surfaces Without any Chemical or Powder Treatment / Contactless LITE is Completely Mobile due to High Powered Batteries / Easy to handle, Lightweight Device / 256 GB memory / Export Photos via TF Card

**Evidence Quality:** Eliminating DNA Contamination or Destruction of Fingerprint / Environment Friendly: Does not Require Fingerprint Powder or Chemical Treatment. Secures Working Environment / Opportunity to View with Gellifter on Difficult and Curved Surfaces.
